

# MATHEMATICS

IN SCHOOL

*From the Editor, Colin Foster:*

It has been a great privilege to have been charged with guest editing this most special of special issues of Mathematics in School in honour of the great mathematics educator Professor Malcolm Swan. Malcolm's legacy over 40 years of active research and development is vast, and I would like to thank the editorial team for agreeing to expand the number of pages in this issue beyond the usual allocation, so as to allow space to represent a greater number of Malcolm's achievements.

*The Contents are:*

Title	Author(s)	Page
Malcolm at the Shell Centre: an illustrated history	Hugh Burkhardt	3
Malcolm Swan	Anne Haworth	11
Memories of Malcolm	Dominic Hudson	12
Learning from Malcolm	Alan H. Schoenfeld	15
Malcolm, mathematics and me	Phil Doro	27
Malcolm Swan	Diane Schaefer	28
Malcolm Swan as a significant influence	Mike Ollerton	29
Working with the Shell Centre from the early years	Alan Wigley	30
Artwork of Malcolm Swan		32
Proportionality with Malcolm	Colin Foster	34
Malcolm Swan - an innovator in mathematics education. Zooming in on the design of "designed student responses"	Sheila Evans	36
Reminiscing Malcolm Swan	Michael A. Buhagiar and James Calleja	40
The digital artist in the mathematics classroom	Diane Dalby	42
"These activities are mostly harmless". Memories of Malcolm Swan at the Standards Unit	Francis Bove, Jane Imrie and Susan Wall	45
Malcolm's impact on Michigan	Mary K. Bouck, Valerie L. Mills and Elizabeth D. Philips	50
Blue box thinking	Lucy Rycroft-Smith	55
Reviews		57

**May 2018 includes the following:**

Titles	Author(s)
Raising student engagement in junior secondary mathematics	Noelene Dunn, Kumar Laxman and Mei Lai
Euclid and the Primes next door	Paul Stephenson
Beautiful lessons. Reflections on the IMPULS Programme 2015	Sandie Blakesley
Reasoning 'smoothly'	Suzanne Strachota
Resource 3: y-Intercepts and Gradients coding problem	Rachael Horsman
Cross number puzzles	Mike Rose
Sangaku 3: Four accessible Sangaku problems	Chris Pritchard
Snapshots from the history of mathematics: Marie-Sophie Germain	Jenny Ramsden
Odd numbers and cubes	A D Keedwell
Morphing clock	Phillip Todd and Hannah Kemper
MEI Insights 2018: Problem solving with technology	Tom Button and Stephen Lee
