Additional Reformed GCSE and A level subject content consultation

The Mathematical Association's Response

If you would prefer to respond online to this consultation please use the following link: https://www.education.gov.uk/consultations

Information provided in response to this consultation, including personal information, may be subject to publication or disclosure in accordance with the access to information regimes, primarily the Freedom of Information Act 2000 and the Data Protection Act 1998.

If you want all, or any part, of your response to be treated as confidential, please explain why you consider it to be confidential.

If a request for disclosure of the information you have provided is received, your explanation about why you consider it to be confidential will be taken into account, but no assurance can be given that confidentiality can be maintained. An automatic confidentiality disclaimer generated by your IT system will not, of itself, be regarded as binding on the Department.

The Department will process your personal data (name and address and any other identifying material) in accordance with the Data Protection Act 1998, and in the majority of circumstances, this will mean that your personal data will not be disclosed to third parties.

- 1. Is the revised GCSE content in each of these subjects appropriate? Please consider:
 - whether there is a suitable level of challenge
 - whether the content reflects what students need to know in order to progress to further academic and vocational education
 - whether the amount of content in the qualification is appropriate and, if not, whether you have any suggestions for removing or adding content

Please provide evidence to support your response:

Comments:

The content is just about appropriate with a significant amount of challenge. The content is of such quantity that concerns exist over whether it is possible to study this course in its entirety over the two years. In its current form it is unlikely to be delivered during standard maths time (especially with the new reformed GCSE mathematics) and some doubts exist as to whether schools would offer it as an optional GCSE. The content does overlap significantly with the A level maths statistical content hence would give pupils a significant advantage when going on to study A level maths, in which statistics is now a compulsory part. We would encourage looking carefully at this overlap and consider removing calculation and interpretation of Pearson's product moment correlation coefficient formula.

We would encourage the inclusion of misleading graphs. Not only should learners know how to construct, read, and analyse statistical diagrams but they should also recognise statistically misleading graphs and understand how data may be manipulated to blur the truth. This is an essential skill in our data rich world. We fail to see why terminology such as null hypothesis will not be required: this should be included.

- 2. Is the revised AS and A level content in each of these subjects appropriate? Please consider:
 - whether the content reflects what students need to know in order to progress to undergraduate study

Please provide evidence to support your response.

All DfE public consultations are required to meet the Cabinet Office <u>Principles on Consultation</u>

The key Consultation Principles are:

- departments will follow a range of timescales rather than defaulting to a 12-week period, particularly where extensive engagement has occurred before
- departments will need to give more thought to how they engage with and use real discussion with affected parties and experts as well as the expertise of civil service learning to make well informed decisions
- departments should explain what responses they have received and how these have been used in formulating policy
- consultation should be 'digital by default', but other forms should be used where these are needed to reach the groups affected by a policy
- the principles of the Compact between government and the voluntary and community sector will continue to be respected.

If you have any comments on how DfE consultations are conducted, please email: consultation.unit@education.gsi.gov.uk

Thank you for taking time to respond to this consultation.

Completed responses should be sent to the address shown below by 5 November 2015

Send by post to: Send by post to: Bethany Caines, Floor 2, Sanctuary Buildings, Great Smith St, Westminster, London SW1P 3BT

Send by email to: 2017qualsreform.CONSULTATION@education.gsi.gov.uk
