 NATIONAL ASSOCIATION FOR NUMERACY  
 AND MATHEMATICS IN COLLEGES

EXPLORATION AND INSIGHTS

### SAVE THE *NEW* DATE – 14<sup>th</sup>-16<sup>th</sup> April 2020

*Save the new Date!* The Mathematical Association and the National Association of Numeracy and Mathematics in Colleges are delighted to confirm the date of our jointly badged annual conference at the stunning Wyboston Lakes from **14th-16th April 2020**. Our confirmed choice of conference dates is deliberate: considering the ongoing single subject association discussions between the classroom-facing organisations, we actively sought both a venue and dates which we believed would enable all members of the mathematical community to join together at an annual conference. Sadly, subsequent events have placed our members in a difficult position following the announcement of another event which clashes with ours. We have decided to respond pro-actively to this challenging development by working with our venue to agree our alternative dates of 14<sup>th</sup> – 16<sup>th</sup> April 2020, ensuring that all our members, sponsors and contributors can continue to enjoy our annual conference.

Our conference theme *Exploration and Insights* is intended to offer delegates an invaluable opportunity to explore new ideas in a lakeside setting designed to maximise face-to-face learning and sharing. As an organisation we are responding to the financial challenges faced by many schools by restructuring our conference packages. Delegates will soon be able to select from a competitively-priced range of cost-effective options - from half days and single days to the full conference experience – we are particularly excited to offer our innovative ‘middle day’ option offering a full day of classroom-focused workshops, with optional evening BBQ and quiz which we hope will prove very attractive for our teaching members. Delegates, and their partners, should note that the venue also offers a superb range of leisure facilities and a relaxing spa which are all available at an additional charge.
